

Servlet session

First Practice program :

Class 1:

```
package sessionPractice;

import jakarta.servlet.ServletException;
import jakarta.servlet.annotation.WebServlet;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;
import jakarta.servlet.http.HttpSession;

import java.io.IOException;

@WebServlet("/A")
public class Class1 extends HttpServlet {
    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        String username=req.getParameter("username");
        String password=req.getParameter("password");

        HttpSession session=req.getSession();
        session.setAttribute("username",username);
        session.setAttribute("password",password);

        resp.getWriter().println("added successfilly ");
    }

    /// /A?username=shahin&password=1233
}
```

Class 2 :

```
package sessionPractice;

import jakarta.servlet.ServletException;
import jakarta.servlet.annotation.WebServlet;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;
import jakarta.servlet.http.HttpSession;

import java.io.IOException;
```

```

@WebServlet("/B")
public class Class2 extends HttpServlet {
    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {

        HttpSession session=req.getSession(false);

        String username = (String)session.getAttribute("username");
        String password =(String) session.getAttribute("password");

        System.out.println(username+ " - "+ password);
        resp.getWriter().println(username+ " - "+ password);
    }
}

```

Second Practice program : Register, Login,Home,Logout

Register class:

```

@WebServlet("/register")
public class Register extends HttpServlet {
    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        resp.setContentType("text/html");
        PrintWriter out=resp.getWriter();
        out.println("<form action=\"register\" method=\"post\">\n" +

            "    <label for=\"name\" >Name</label>\n" +
            "    <input type=\"text\" name=\"username\"
id=\"name\">\n" +
            "    \n" +
            "    <label for=\"password\" >password</label>\n" +
            "    <input type=\"password\" name=\"password\"
id=\"password\">\n" +
            "    \n" +
            "    <button type=\"submit\"> submit</button>\n" +
            "    </form>\n"

        );
    }

    @Override

```

```

        protected void doPost(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
            String userName=req.getParameter("username");
            String password=req.getParameter("password");

            HttpSession session = req.getSession(true);
            session.setAttribute("username", userName);
            session.setAttribute("password", password);
            resp.sendRedirect("login");
        }
    }
}

```

Login class:

```

@WebServlet("/login")
public class Login extends HttpServlet {

    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        resp.setContentType("text/html");
        resp.getWriter().println(
"<form action=\"/login\" method=\"post\">\n" +
        "\n" +
        "    <label for=\"name\">Name</label>\n" +
        "    <input type=\"text\" name=\"username\" id=\"name\">\n" +
        "\n" +
        "    <label for=\"password\">Password</label>\n" +
        "    <input type=\"password\" name=\"password\"
id=\"password\">\n" +
        "\n" +
        "    <button type=\"submit\">Submit</button>\n" +
        "</form>"
        );
    }

    @Override
    protected void doPost(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {

        HttpSession session=req.getSession(false);
        String userName=req.getParameter("username");
        String password=req.getParameter("password");

        if (session!=null){
            resp.setContentType("text/html");
            String name =(String)session.getAttribute("username");
            String pas =(String)session.getAttribute("password");

```

```

        if (userName.equals(name) && password.equals(pas)) {
            resp.sendRedirect("home");
        }
        else {
            resp.getWriter().println("invalid user");
        }
    }
}
}
}

```

Home class:

```

@WebServlet("/home")
public class Home extends HttpServlet {

    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        resp.setContentType("text/html");
        resp.getWriter().println(
            " \<form action='logout' method='post'>\n" +
            " \<button type='submit'
class='logout-btn'>Logout</button>\n" +
            " \</form>\n"
        );

        HttpSession session=req.getSession(false);
        if (session!=null){

resp.getWriter().println("<h1>home</h1>"+session.getAttribute("username
"));
        }else {
            resp.sendRedirect("login");
        }
    }
}
}

```

Logout:

```

@WebServlet("/logout")
public class Logout extends HttpServlet {

    @Override

```

```

protected void doPost(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
    HttpSession session=req.getSession(false);

    if(session!=null){
        session.invalidate();
        resp.sendRedirect("login");
    }
    else {
        resp.sendRedirect("login");
    }
}
}

```

Cookies

First Program practice

```

@WebServlet("/cookie1")
public class class1 extends HttpServlet {
    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        String username="raja";
        String password="123";

        Cookie cookie=new Cookie("username",username);
        Cookie cookie1=new Cookie("password",password);

        cookie.setMaxAge(200);
        cookie1.setMaxAge(200);

        //        cookie.setHttpOnly(true);
        //        cookie1.setHttpOnly(true);
        //
        //        cookie.setSecure(true);
        //        cookie1.setSecure(true);
        //
        //        cookie.setPath(username);
        //        cookie1.setPath(password);
        //
        //        cookie.setDomain("shahin");
        //        cookie1.setDomain("shahin");

        resp.addCookie(cookie);
        resp.addCookie(cookie1);
    }
}

```

```
}  
}
```

Second Program practice

Class 1

```
package servletCookieLogin;
```

```
import jakarta.servlet.ServletException;  
import jakarta.servlet.annotation.WebServlet;  
import jakarta.servlet.http.Cookie;  
import jakarta.servlet.http.HttpServlet;  
import jakarta.servlet.http.HttpServletRequest;  
import jakarta.servlet.http.HttpServletResponse;  
  
import java.io.IOException;  
@WebServlet("/login1")  
public class Login extends HttpServlet {  
    @Override  
    protected void doGet(HttpServletRequest req, HttpServletResponse  
resp) throws ServletException, IOException {  
        resp.setContentType("text/html");  
        resp.getWriter().println(  
            "<form action=\"login1\" method=\"post\">\n" +  
            "\n" +  
            "    <label for=\"name\">Name</label>\n" +  
            "    <input type=\"text\" name=\"username\"  
id=\"name\">\n" +  
            "\n" +  
            "    <label for=\"password\">Password</label>\n"  
+  
            "    <input type=\"password\" name=\"password\"  
id=\"password\">\n" +  
            "\n" +  
            "    <button type=\"submit\">Submit</button>\n"  
+  
            "</form>"  
        );  
    }  
  
    @Override  
    protected void doPost(HttpServletRequest req, HttpServletResponse  
resp) throws ServletException, IOException {  
        String userName=req.getParameter("username");  
        String password=req.getParameter("password");
```

```

        Cookie logcookie=new Cookie("username",userName);
        Cookie logcookie1=new Cookie("password",password);

        logcookie.setMaxAge(60*60*48);
        logcookie1.setMaxAge(60*60*48);

//        logcookie.setHttpOnly(true);
//        logcookie1.setHttpOnly(true);

        resp.addCookie(logcookie);
        resp.addCookie(logcookie1);

        resp.sendRedirect("home1");
    }
}

```

Class 2

```
package servletCookieLogin;
```

```

import jakarta.servlet.ServletException;
import jakarta.servlet.annotation.WebServlet;
import jakarta.servlet.http.Cookie;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;

import java.io.IOException;

@WebServlet("/home1")
public class Home extends HttpServlet {
    @Override
    protected void doGet(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        resp.setContentType("text/html");
        resp.getWriter().println(
            " \<form action='logout1' method='post'>\</form>" +
            " \<button type='submit' " +
            " class='logout-btn'>Logout</button>\</form>" +
            " \</form>" +
            " \</form>"
        );

        Cookie[] cookies = req.getCookies();
        resp.getWriter().println("<h1>home</h1>");

        if (cookies != null) {
            for (Cookie cookie : cookies) {
                resp.getWriter().println(cookie.getName() + " - " +
cookie.getValue());
            }
        }
    }
}

```

```

        }
    } else {
        resp.sendRedirect("login1");
    }
}
}
}

```

Class 3

```
package servletCookieLogin;
```

```

import jakarta.servlet.ServletException;
import jakarta.servlet.annotation.WebServlet;
import jakarta.servlet.http.Cookie;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;

import java.io.IOException;

@WebServlet("/logout1")
public class Logout extends HttpServlet {
    @Override
    protected void doPost(HttpServletRequest req, HttpServletResponse
resp) throws ServletException, IOException {
        Cookie[] cookies=req.getCookies();
        for(Cookie cookie:cookies){
//            System.out.println(cookie.getName());
            cookie.setMaxAge(0);
            resp.addCookie(cookie);
        }
        resp.sendRedirect("login1");
    }
}

```
